

### BIRDS OF PAYNE COUNTY

Geo. A. Moore, Oklahoma A. and M. College.

The following list of birds has been compiled from the observations and collections of Professor R. O. Whinton, Mr. F. W. Vandemark and the author. As a usual thing, the date given is the date upon which that particular specimen was collected for the Oklahoma A. and M. College museum. Where no specimen has been collected, observation dates were supplied.

The abbreviations used are: P. R.—Permanent Resident; S. R.—Summer Resident; T. V.—transient visitant; W. R.—winter resident; C.—common; T. C.—tolerably common; R.—rare; A.—abundant. An asterisk is placed before the names of all specimens that have been collected.

6 \*Pied-billed Grebe, Oct. 8, 1923 T. V. C
