

**XXV. FISH OF THE PONDS AND STREAMS OF OK-  
MULGEE COUNTY**

**Edith R. Force  
Tulsa, Oklahoma**

These specimens were collected under the direction of the writer from the ponds and streams of Okmulgee County, Oklahoma, during the early summer of 1926

They have been identified by the United States National Museum, Washington, D. C., and representative specimens deposited in this Museum. The names have been supplied by Mr. Carl L. Hubbs, University of Michigan. Duplicate specimens have been retained by the High School Museum of Okmulgee, Oklahoma, and others presented to the University of Oklahoma Museum of Zoology, Norman, Oklahoma, and to the University of Michigan Museum of Zoology, Ann Arbor, Michigan. There were collected, in all, about 800 specimens representing the following species and subspecies:

- Ameiurus melas catulus** (Rafinesque) Fat-head Minnow  
**Pimephales promelas confertus** (Girard) Catfish; Hornpout  
**Hyborhynchus notatus** (Rafinesque) Blunt-nose Minnow  
**Notropis lutrensis** (Baird and Girard) Red-fin Shiner  
**Notemigonus crysoleucas** (Mitchill) Golden Shiner; Roach; Bream  
**Fundulus notatus** (Rafinesque) Black-striped Top-Minnow  
**Gambusia patruelis** (Baird and Girard) Top-minnow  
**Labidesthes sicculus** (Cope) Brook Silversides  
**Pomoxis sparoides** (Lacépède) Black Crappie; Calico Bass.  
**Apomotis cyanellus** (Rafinesque) Blue-spotted Sunfish  
**Allotis humilis** (Rafinesque) Orange-spotted Sunfish  
**Helioperca incisor** (Cuerer and Valenciennes) Bluegill; Bream  
**Xenotis megalotis fallax** (Baird and Girard) Long-eared Sunfish
