

## AMPHIBIA FOUND IN A SURVEY OF TULSA COUNTY AND VICINITY

A. P. Blair and H. D. Chase, *Tulsa, Oklahoma*

During the spring, summer, and fall of 1935, a considerable amount of collecting was done in the Tulsa region. Dates of the occurrence of the specimens taken were recorded and notes on natural history were made. The work on the Amphibia of northeastern Oklahoma is being continued and more complete accounts will appear later.

The following is merely a catalog of species taken thus far from this region:

*Necturus maculosus* Rafinesque. Mudpuppy

*Ambystoma texanum* Matthes.

*Triturus viridescens* Rafinesque. Newt.

*Eurycea melanopleura* Cope.

*Bufo woodhousei* Girard. Rocky Mountain Toad.

*Hyla versicolor chrysocephala* Cope. Tree Toad (Field Museum's identification).

*Acris gryllus crepitans* Baird. Cricket Frog. (Wright's identification).

*Pseudacris triseriata* Wied. (Field Museum's identification).

*Pseudacris streckeri* Wright & Wright.

*Rana pipiens* Schreber. Leopard Frog. (Wright's identification; Field Museum called this frog *R. sphenoccephala*).

*Rana clamitans* Latrelle. Green-frog.  
*Rana catesbeiana* Shaw. Bullfrog.  
*Rana areolata* Bard & Girard. Northern Gopher Frog.  
*Gastrophryne texensis* Girard.
