
THE SECOND STATE RECORD ON
MONOTROPA UNIFLORA L.

B. D. BARCLAY, University of Tulsa, Tulsa

On a collecting trip to southeastern Oklahoma in late October 1947 the Indian pipe or ghost flower, *Monotropa uniflora* L., was again found in the State. The new station for this plant is located in Le Flore County, on the north bank of the Kiamichi River, where the highway from Big Cedar to Octavia crosses the river. The plant was growing abundantly in rich leaf mold under a mixed-pine-and-hardwood forest.
