
Preparation of Manuscripts for Publication in the Proceedings of the Oklahoma Academy of Science

The editorial board will consider for publication in the *Proceedings* papers submitted by members of the Academy. The editorial board reserves the right to select from papers submitted those most deserving of publication. Each member offering a paper accepted for publication is allowed one page of space in the *Proceedings* without cost. Space beyond this limit shall be available at a per-page cost to be fixed by the Executive Council, this cost to be kept as low as the financial condition of the academy will permit. Authors shall also supply or be assessed the cost of supplying any necessary etchings and engravings.

Manuscripts should be original typed copies, double spaced throughout. Margins of at least 1.5 inches should be left on all sides to permit proof-marking and required editorial changes. Leave all headings unscored. These will be proofmarked by the editor in accordance with the practice of the journal. Avoid footnotes as far as possible. When footnotes are used in the text, they should be numbered with Arabic numerals; when used in tables footnotes should be designated by the asterisk, double asterisk, dagger, double dagger, and section in this sequence as needed.

The author's name and the figure number should be written on the back of copy for each figure. Do not put legends into or on the figure, either front or back. Type all legends, *double spaced*, properly numbered to correspond to the figures, on a *separate sheet* of your manuscript. Graphs and drawings should be inked (India ink) with fairly heavy lines and with lettering of fairly uniform size. Photographic prints should be submitted on gloss-finish paper.

Tables should each be placed on a separate page. The general form of tables should comply with that of tables in this issue.

The authors name and address should be clearly indicated. The editor and the secretary should be advised immediately if there is a change of address.

The citation of literature should follow the form used in the present issue. Literature cited should be typed *double spaced*. Give complete citations: author, year, title, journal name, volume number, and inclusive pages. Do not list references unless they are cited in the text. The abbreviations used in literature cited are those given in "List of periodicals abstracted by Chemical Abstracts" published by the American Chemical Society, Ohio State University, Columbus, Ohio.

Before submitting a paper to the editors for publication in the *Proceedings*, the author should have it read critically by not less than two qualified workers in the area of knowledge in which the paper falls. The approval of these readers should be indicated on a page attached to the manuscript.

Volume XXXIII of the Proceedings of the Oklahoma Academy of Science was mailed on April 20, 1954.
