

Some Further Records of Snail Distribution By Counties in Oklahoma*

BRANLEY BRANSON and I. E. Wallen, Oklahoma A. & M. College,
Stillwater, Oklahoma

The listing of Oklahoma snails by counties was initiated by Lutz (2) in 1949 and continued by Wallen (3), Wallen and Danlap (4), Dundee (1), and Webb (5). This paper presents data on the snails collected for the most part from drift areas along the banks of streams, although some specimens were taken singly from various localities. The 521 new county records include data for 77 species. The specimens are deposited in the Museum of Zoology of the Oklahoma Agricultural and Mechanical College. The writers wish to acknowledge the assistance of Mr. G. H. Wallen and various other individuals in securing collections.
