

**IN MEMORIAM****Gladys E. Braden****.....-1967**

Although news of the death of Gladys E. Braden at Duluth, Minnesota, reached us in 1967, efforts to obtain vital statistics were fruitless. Miss Braden was a member of the Oklahoma Academy of Science for many years and a faithful contributor to Section B (Geology). In 1946 she presented her first paper at the Fall Meeting. An abstract of that paper appeared in Volume 27. From that time on to her death she maintained an active interest in hydrography, particularly in reference to stream characteristics. —Editor.
