

formation about becoming a CIOS Associate, send the message "help topics CIOS."

According to Charles E. Cottle (Political Science, U Wisconsin-Whitewater), *Operant Subjectivity* is now indexed by Uncover, which is an electronic mail online index accessible through CARL, the Colorado Alliance of Research Libraries. Institutions such as university libraries can subscribe to CARL's services for approximately \$900 annually; however, since "Uncover now provides access to over 1,722,000 articles in over 10,600 journals" (CARL announcement, July 1991), the fee can be seen as something of a bargain, even though the index is only a couple of years deep for many periodicals. A service provided by CARL is the Fax delivery of any articles in the index. The cost per article runs between \$7.50 and \$10.00, which is expensive but better than nothing for individuals wishing to obtain copies of articles previously appearing in *OS*. For persons linked to email and whose institutions have membership in CARL, the service can be accessed through Telnet. Information and phone numbers are provided when users log on.

#### Qualitative Seminar

The University of Georgia is planning a 4½ week summer workshop in advanced qualitative methods, to be offered June 18-July 14. Participation will be limited to 15 graduate students or postdoctoral scholars. The program will include seminar sessions covering issues such as choosing a setting and a problem, fieldwork roles, ethics of fieldwork, collection and analysis of qualitative data, and writing qualitative accounts. The program also involves participants in direct fieldwork in settings in or near Athens, working under the guidance of University faculty experienced in field research. For further information, contact Linda Grant, Department of Sociology, University of Georgia, Athens, Georgia 30602; phone (404)542-2421, Bitnet LGrant@UGA, or Internet LGrant@UGA.cc.uga.edu.

## 8th Q Conference

University of Missouri  
22-24 October 1992

The International Society for the Scientific Study of Subjectivity is scheduled to hold its annual conference at the University of Missouri-Columbia, October 22-24, 1992. Essentially, the Society was founded to continue the pioneering work that William Stephenson developed in the realm of subjective science and Q methodology. While the conference will focus on Stephenson's philosophical, theoretical and methodological discourse, work which informs and is informed by subjective science and Q is certainly welcome. The Society is interdisciplinary in its orientation, hence engages differing narratives. We are thus open to a variety of empirical, critical, historical, cultural and philosophical discourses which embrace the subjective scientific project. Completed manuscripts with 200 word abstract should be submitted in duplicate by July 1, 1992 to Professor Irvin Goldman, ISSSS 1992 Program Chair, Department of Communication Studies, University of Windsor, Windsor, Ontario N9B 3P4, Canada. All papers will be subject to peer review, and those arriving by the above date will be given priority on the program; however, efforts will be made to accommodate papers arriving after the deadline as long as program space remains available.

The guest speaker at this year's conference will be Donald Theall of Trent University. Professor Theall received his undergraduate degree in English literature from Yale University (1950). His graduate degrees (M.A. and Ph.D., English literature, 1954) are from the University of Toronto, where he studied with Marshall McLuhan. During his Toronto years, Dr. Theall was one of the original participants and secretary of the now famous McLuhan Culture and Communication Seminars, and contributed to the McLuhan-Carpenter publication *Explorations*. Professor Theall has published numerous scholarly works on McLuhan, Innis, Pope, and Joyce. He apparently met William Stephenson in the early '60s, where he developed an appreciation for Q and its underlying theories of communication. Dr. Theall is a former Professor and Chairperson of the English Department at McGill University, where he also founded the first Canadian doctoral program in communication. More recently he served as President of Trent University (Peterborough, Ontario) where he currently holds the Chair of University Professor. Those interested in the nature of his work, see *The Medium Is the Rear View Mirror: Understanding McLuhan*, McGill-Queen's University Press, 1971.
