In future issues...

The January 1990 issue of *Operant Subjectivity* will be a memorial issue for William Stephenson, and will contain personal reflections by those who knew him. Subsequent issues will contain Stephenson's "Fifty Years of Exclusionary Psychometrics," which is critical of the journal *Psychometrika* for having ignored the principles of Q methodology, and which elaborates the quantum-theoretical approach to subjective psychology stemming from Spearmanian factorization.

*Parenthetical information, where available, indicates year, volume, and page number, respectively, of abstracts appearing in *Dissertation Abstracts International* and its predecessors.
